Inspiral clock at $\chi_1 = 0$: pass-40 fit vs second-order self-force (1PA) theory
fitted (pass 40), q = 3
1PA theory, c = 1.19
fitted (pass 40), q = 5
1PA theory, c = 3.54
fitted (pass 40), q = 8
1PA theory, c = 5.07
