energy_anchored_spin: mismatch split at the primary's Kerr ISCO (installed coefficients, one shared $t_0, \phi_0$; each segment normalised by its own NR norm)
inspiral: $\log_{10}\mathcal{E}$ on $[-5000, t_{\rm isco})$
merger-ringdown: $\log_{10}\mathcal{E}$ on $[t_{\rm isco}, +100]$
$t_{\rm isco}$ on the NR clock (M; NR peak at about 0)
$\chi_1$
